

WiFiRanger is pleased to provide LTE solutions that are not locked into a specific Cellular carrier. This approach gives the customer increased flexibility over other competing offerings which are tied to a specific carrier or data plan. WiFiRanger LTE solutions give you the freedom to find the perfect plan for your needs.

The Cellular landscape is always evolving and advancing, so our goal is to assist you in making the most of the myriad of data options available. The following advice is to help you navigate the data plan and activation topics that are applicable to our LTE solutions. Be aware, the LTE solutions offered by WiFiRanger are subject to change based on the changing Cellular landscape.

If you are upgrading a Sky4 or SkyPro to an embedded LTE module, please be sure to check for updates on the WiFiRanger control panel after installing the module. If you are experiencing problems, contact WiFiRanger to assist in getting your WiFiRanger configured to support the new modem.

The WiFiRanger LTE Modem supports the following LTE bands: LTE B2, B4, B5, B13, B17 & HSPA+ B2, B5. If you are considering changing your carrier, be sure to check that they support the bands listed above.

IMPORTANT CONSIDERATIONS

- **Data Plan Availability Varies by Region**

Some Cellular carriers offer certain data plans by region. As such, you may find that the data plan that you desire is available through a Cellular reseller or representative in another area while your local representative has more limited options. Check around or call a representative in another region if you can't find what you want locally.

- **SIM Card Type May Affect Data Plan Options**

WiFiRanger provides desirable SIM card types for typical consumer data plans. However, there are differing types of SIM cards assigned to business plans or otherwise that may be more suited for your specific requirements. It is important to ask your Cellular carrier if the SIM card you provide them is the right kind to meet your data needs.

- **Ease of Device Activation Varies by Reseller / Carrier**

In some cases, it can be difficult to activate the WiFiRanger LTE modem and SIM card depending on the representative you speak with. Some representatives work for a Cellular reseller that does not have the offerings you desire, or you may need a more knowledgeable representative to handle your request. Ask different Cellular stores, resellers, or a direct Carrier representative until you find the right person to activate your modem and SIM card on the desired plan.

- **Data Plan Pricing Depends on Your Cellular Account**

In large part, the price of data plans for the WiFiRanger LTE modem are affected by your Cellular account type and other data plan(s) on your account. In some cases, the WiFiRanger LTE modem will require having a data-only plan that is separate from the data plan attached to your smartphones or other devices. Checking with your carrier on costs will help you to understand how the carrier will handle the WiFiRanger LTE modem pricing and data amounts available.
